1 Introduction

1.1. Purpose

1.1.1. Goals

Here are the goals that BBP has to fulfill. BBP has to:

- G1: Recognize suitable bike paths
- G2: Allow the user to browse different bike paths
- G3: Allow the user to see bike paths statistics
- G4: Allow the user to search for paths between two locations
- G5: Allow the user to see paths optimality based on other registered users' reviews
- G6: Allow user to see weather information when available
- G7: Allow users to register to the application using credentials
- G8: Allow registered user to review published bike paths
- G9: Allow registered user to confirm or reject false positives in track recording
- G10: Allow registered user to let the system to automatically record suitable bike paths
- G11: Allow registered user to manually create suitable bike paths
- G12: Allow registered user to publish bike paths
- G13: Allow the store of bike paths data for registered users
- G14: Allow registered user to add publishable information about bike paths

Chapter 3

4 | Formal Analysis Using Alloy

In this chapter we will focus on the testing of particular specifications using Alloy.

What do we model How do we model it Assumptions

Alloy snippets

5 Effort Spent

A table representing the total hours of work is shown here.

Work Areas	Alessandro Burato	Gabriele Crimella	Davide Faccin
Introduction	1.5h	1.5h	0h
Overall Description	0h	0h	0h
Specific Requirements	0h	0h	0h
Alloy	0h	0h	0h
Group Meetings and Reviews	8h	8h	8h
